

CISO AS A SERVICE

Not sure where to start? Improsec CISO as a service adds resource and competence and will get you closer to the desired security level from day one.

Improsec offers to either act as interim CISO for your company or as an advisor to the existing IT and Security Management. The solution is flexible and scalable depending on customer situations and needs. Therefore, the scope and service can be tailored to match many different types of activities from increase cyber awareness, building strategies, governance, and long-term plans to more urgent tasks as stepping in to guide the company through a cyber crisis and advice management and decision-makers.

Value

- Enables decision-makers to understand the cyber threats and risks within the organization including insider threats and the potential impact on the business.
- Enables decision-makers to define risk appetite in an acceptable balance between security and business requirements.
- Getting a neutral part to speak or to discuss cyber risk with decision-makers can be beneficial for decision making
- Flexible and scalable solution depending on customer situation and needs

Method

Based on dialogue we agree on the service needed. We can provide advisory to existing Security Management or act as interim CISO. We can speak to boards or top management on behalf of security or IT management. We deliver experienced leadership and advisory for the C-level on strategic cyber risk decisions and prioritization. Moreover, we deliver guidance in needed resources and selecting activities to meet security requirement.

Involvement

Through a close dialogue, we will, together, agree on scope and content.

Product

- Advising existing Security Management (e.g., CISO or IT Management)
