

CYBER RISK MANAGEMENT

Do you know the security threats around the company and how vulnerable you are? Improsec offers to get the overview that enables you to act in time.

We focus on creating transparency and not on reaching zero risk, so we can make informed decisions regarding cyber risk management. Our advisory in risk management is based on a combination of meetings, workshops and interviews while also considering organizational culture. Part of the interviews focus is to identify current and desired competency and capacity needs within the organization. We do this to have a feasible outcome and to ensure the organization is fit to manage risk going forward.

Value

- A structured approach enables transparency of risk and help make informed decisions
- Balance cost and resources to mitigate cyber risk
- Good risk management practices is essential to handle or prepare for potential events that might have a significant impact on business objectives

Product

The deliverable of the assessment is a written report containing the following:

- Risk identification, evaluation of sources and existing methods
- Deep dive analysis of identified risk, reviewing existing controls
- Conducting root cause analysis
- Managing risk through defining risk appetite/ tolerance and controls
- Communicate risk through reporting and training stakeholders such as risk management specialists, risk owners or other key decision-makers

Method

We focus on creating transparency and not on reaching zero risk, so we can make informed decisions regarding cyber risk management. Our advisory in risk management is based on a combination of meetings, workshops, and interviews while also considering organizational culture. Part of the interviews focus is to identify current and desired competency and capacity needs within the organization. We do this in order to have a feasible outcome and to ensure the organization is fit to manage risk going forward.

Involvement

Through a close dialogue we will, together, agree on scope and content.
